Fibrinogen Standard

REF 354 001  1 X 0.5 ml

Intended Use
Preparation of reference curves for quantitative immunochemical determination of Fibrinogen in citrated plasma by turbidimetry and nephelometry.

Composition
A lyophilized preparation of stabilized, buffered human plasma containing less than 5% bovine plasma.

Preparation
1. Reconstitute the Fibrinogen standard with 0.5 ml of distilled or deionised water.
2. Stopper vial and allow to stand until fully hydrated (a minimum of 5 minutes).
3. Gently mix by rotation or inversion until dissolution is complete.
4. Allow to equilibrate for a total of 30 minutes before use.

Storage and Stability
Stored at +2 to +8 C the Fibrinogen standard remains stable up to labelled expiry date. After reconstitution, the Fibrinogen standard is stable for 48 hours at +2 to +8 C when stored in the original vial in a sealed polypropylene container.

Precautions and Warnings
1. Fibrinogen standard is for "In Vitro Diagnostic Use"
2. Fibrinogen standard is apotentially biohazardous material.
3. Source materials rom which this product was derived were found negative for HBsAg and for antibodies against HCV, HIV-1 and HIV-2 by approved test methods. However, since no test method can offer complete assurance that infectious agents are absent, this product should be handled observing the same safety precautions employed when handling any potentially infectious material.
4. Fibrinogen Standard is Harmful. Harmful in contact with skin. Irritating to eye, respiratory system and skin. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

Assigned Value
The value is lot dependent. Actual value is printed on the label.
